

Fungal trait vs. date

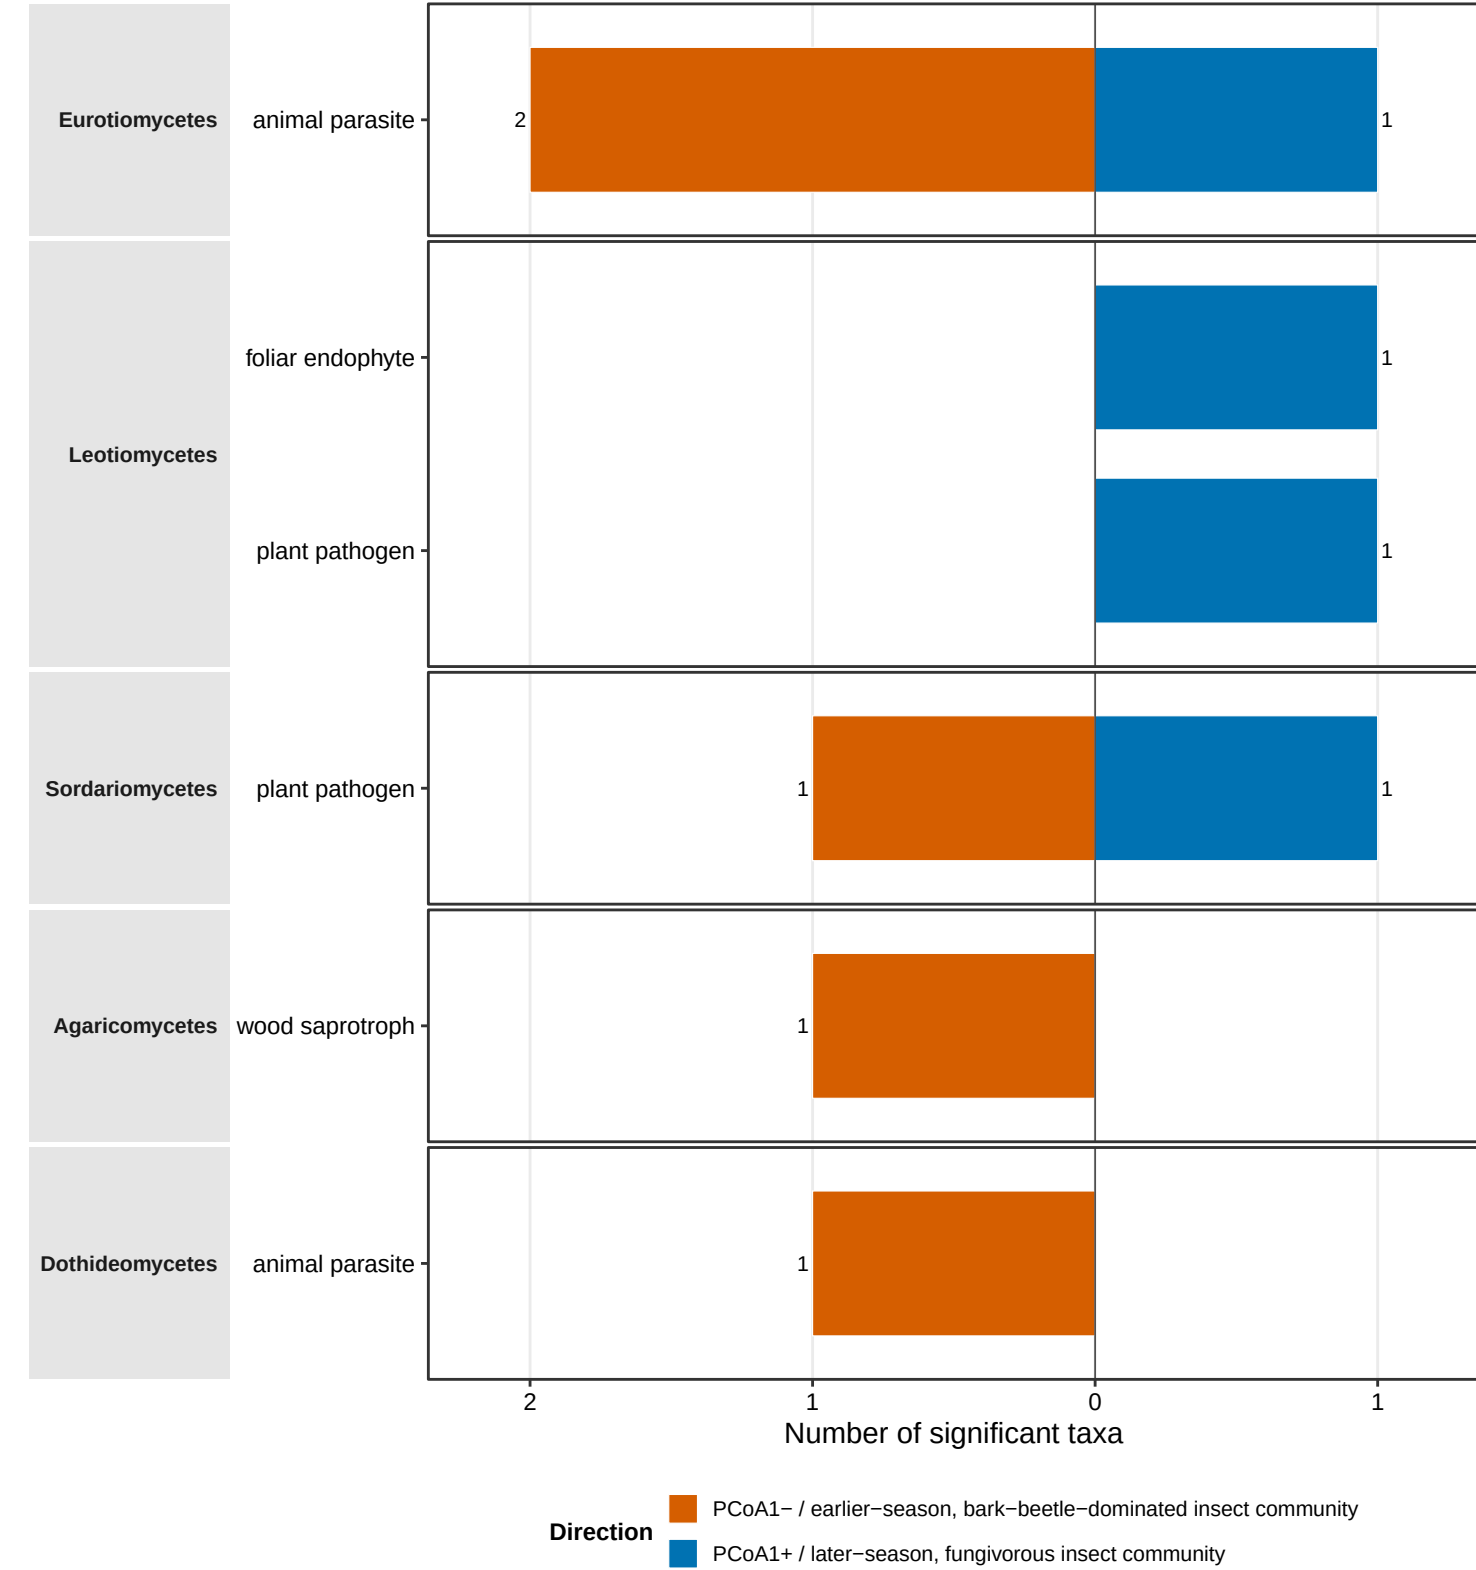

1747 taxa with a FungalTraits match and a significant peak-timing call (970 late + 576 early + 153 mid-season + 48 bimodal) across 20 lifestyles; classes/cells with <6 taxa omitted/f

Peak timing
Peaks late season
Peaks mid-season
Peaks early season
Bimodal (early + late)

Fungal trait vs. insect PCoA1

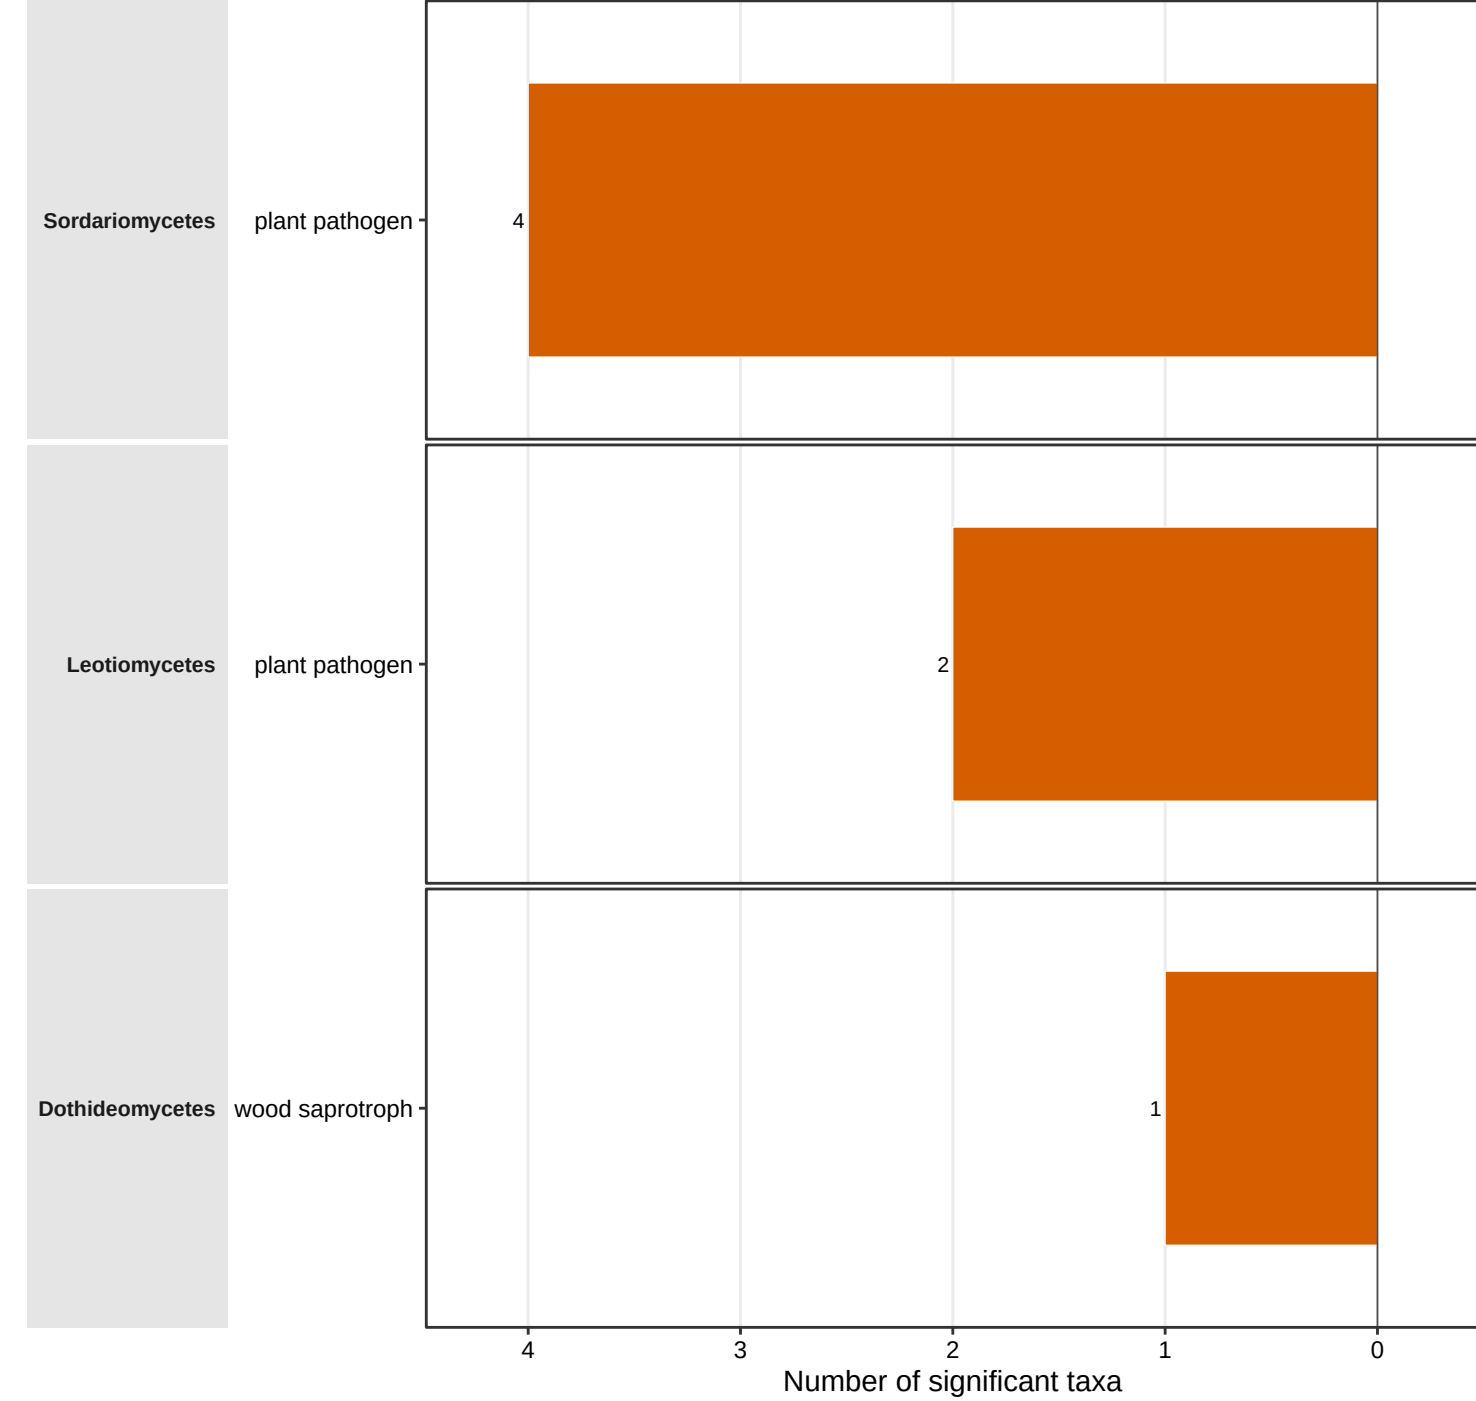

9 taxa with a FungalTraits match across 4 lifestyles, all classes/cells shown, q<0.10, factor(date)-adjusted

Direction
PCoA1- / earlier-season, bark-beetle-dominated insect community
PCoA1+ / later-season, fungivorous insect community

Fungal trait vs. insect PCoA2

7 taxa with a FungalTraits match across 2 lifestyles, q<0.10, factor(date)-adjusted -- but UNSTABLE across date controls: 6/200 unadjusted, 0/200 quadratic-date; small-sample-sensitive, see text

Direction
PCoA2-
