

Fungal taxa vs. date -- family within order

1467 taxa significant in >=1 term (1280 linear + 467 quadratic = 1747 hit-instances) in 14 of the orders from fig4a/b, by family

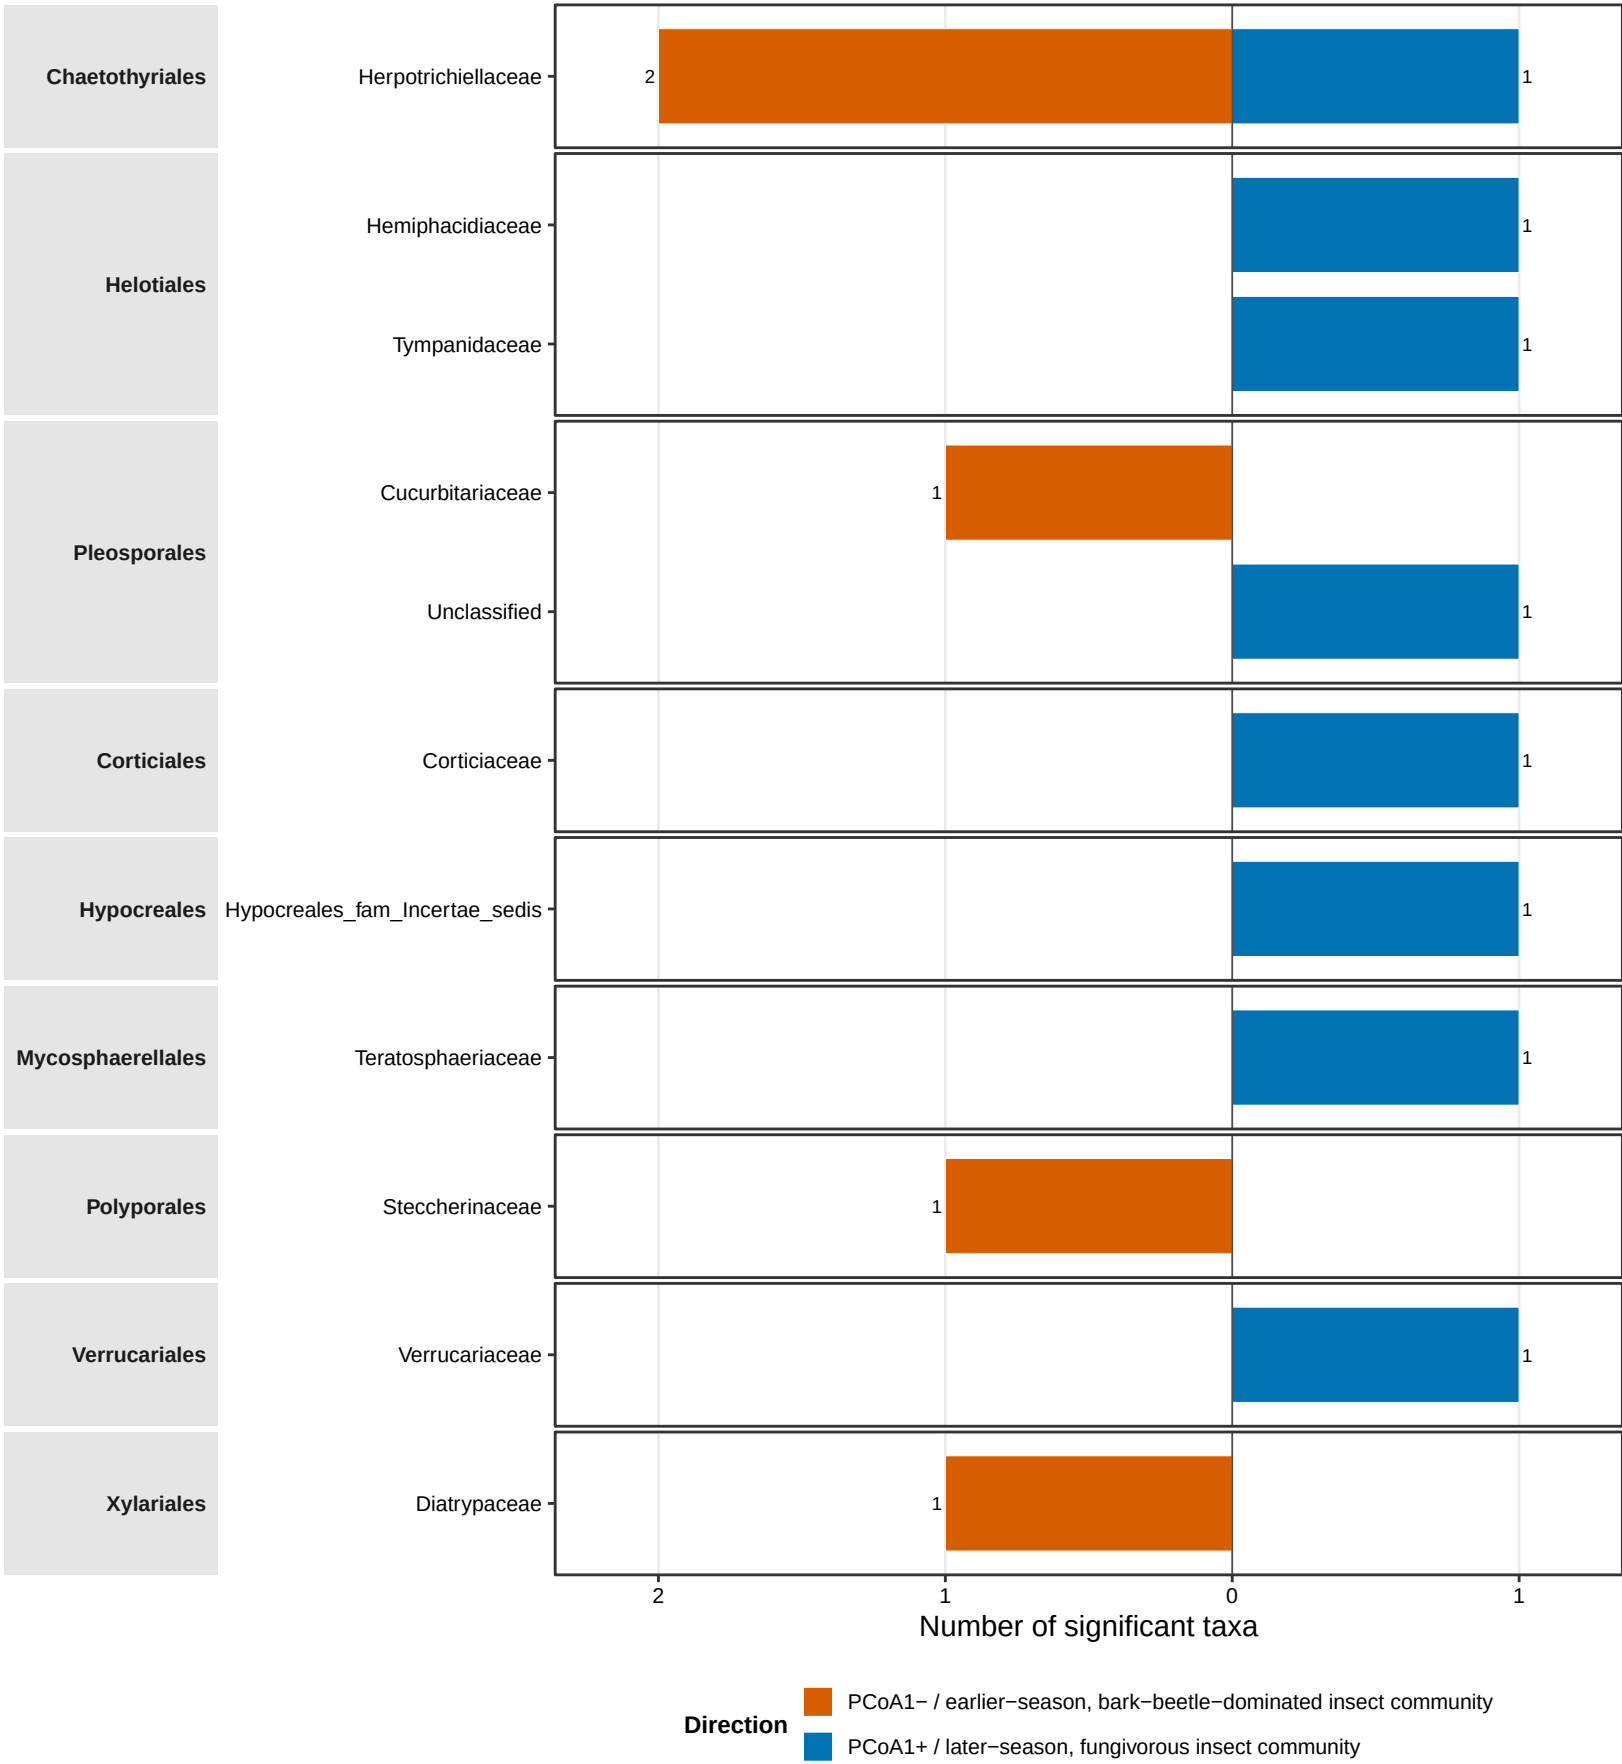

Term / direction
Later season (linear, t>0)
Earlier season (linear, t<0)
Dip (quadratic, t>0)
Hump (quadratic, t<0)

b

Fungal taxa vs. insect PCoA1 -- family within order

13 taxa across 9 of the orders from fig4c, by family (q<0.10, factor(date)-adjusted)

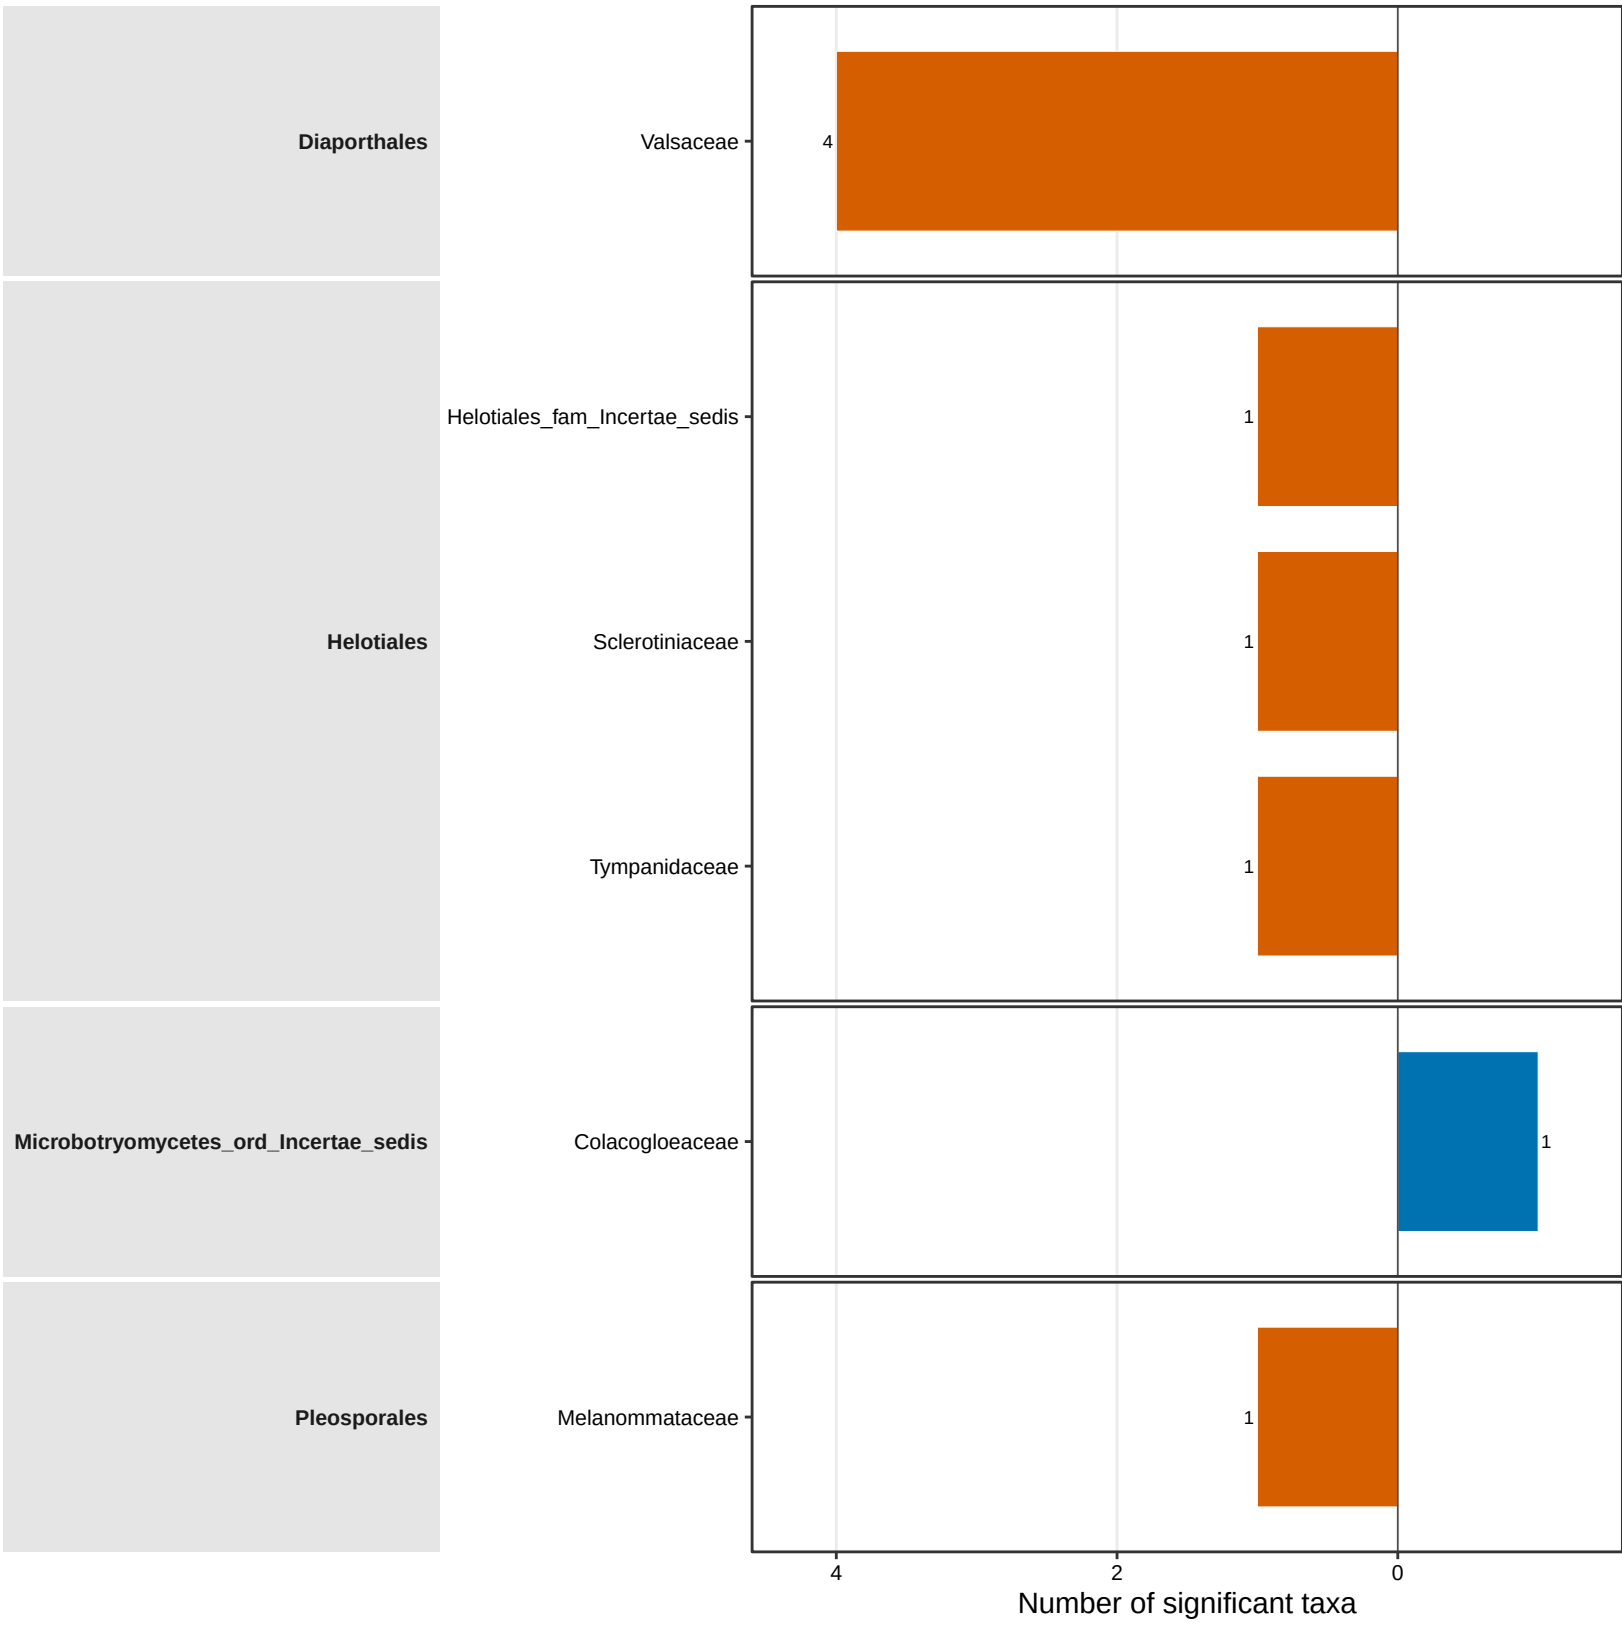

Direction
PCoA1- / earlier-season, bark-beetle-dominated insect community
PCoA1+ / later-season, fungivorous insect community

c

Fungal taxa vs. insect PCoA2 -- family within order

9 taxa across 4 of the orders from fig4d, by family (q<0.10, factor(date)-adjusted) -- small n, unstable across date controls, see fig4d

Direction
PCoA2-
PCoA2+
